Professional Experience

1. Service Desk Engineer (Intern)

Employer: INQ Digital (formerly Skyband), Lilongwe, Malawi

Duration: February 2026 to Present

Key responsibilities include:

- Monitoring network and device status using Cacti and documenting end-of-shift device reports.
- Receiving, logging, and tracking customer incidents and service requests, including internet outages, intermittent connectivity, slow speeds, signal degradation, email delivery issues, and other network-related faults, as well as handling requests for email password resets, mailbox creation and additions, and additional services.
- Performing basic troubleshooting of internet, network and connectivity-related issues.
- Monitoring network and service alarms and escalating incidents in accordance with established procedures.

- Assisting with customer communications, including incident acknowledgements, updates, and follow-ups.
- Maintaining accurate records within ticketing, monitoring, and operational systems.
- Supporting service assurance activities through incident tracking, reporting, and SLA monitoring.
- Assisting technical teams with routine operational and administrative tasks as assigned.
- Preparing shift handover notes, incident reports, and other operational documents.
- Adhering to company policies, operational procedures, and information security requirements.
- Participating in training and knowledge-sharing activities to develop technical and customer support skills.

2. Technical Training Volunteer

Inq. Digital Ltd

Duration: September 2026 to Present

Key responsibilities include:

- Trained interns on the INQ ticketing system, including ticket creation, incident categorisation, escalation, follow-ups, and service-desk workflows.
- Shared practical knowledge of network troubleshooting, service monitoring, and incident management, supporting interns in adapting to ISP operations.
- Orient newly recruited interns on Internet backbone operations, ISP network infrastructure, and GPON technology, including the underlying principles of how GPON networks deliver connectivity.

3. ICT Support Officer (Intern)

Employer: Balaka District Council

Duration: October 2025 to January 2026

Key responsibilities include:

- Assisted in field data entry activities and maintained accurate records of the Climate Smart-Enhanced Public Works Program (CS-EPWP) project.
- Assisted in handling and managing incidents of participants under the CS-EPWP project.
- Participated in the planning and implementation of the projects with stakeholders at district and community levels.
- Provided technical support on hardware and software systems.
- Diagnosed and performed first-line troubleshooting for internet, network infrastructure and connectivity-related incidents before escalation.
- Performed any other duties that were assigned from time to time.

Academic Qualifications

1. **Bachelor of Science in Business Information Technology (BIT)** (2022 – 2026), Malawi University of Science and Technology (MUST)
-

Certifications

Course	Platform	Year
Legacy Responsive Web Design v8	freeCodeCamp	2025
Introduction to Artificial Intelligence	Coursera	2025
JavaScript	freeCodeCamp	2026

Key Achievements

- Delivered exceptional service at the Inq. Digital Service Desk, closing 5–10 tickets daily with an average handling time (AHT) of 4 minutes while maintaining a 95%+ customer satisfaction rate.
 - Collaboratively installed and configured a wireless network, including configuring PPPoE, at Lilongwe Pentecostal Church in Area 18, working alongside a field engineer to support reliable network connectivity.
-
